

Call for Application for the Position of Research Associate

SANEM is one of the leading think-tanks in South Asia, initiated to build a network of economists and policymakers. Established in 2007, SANEM aims to promote the production, exchange, and dissemination of basic research knowledge with a special focus on economic modeling in the areas of international trade and regional integration, poverty, inequality and growth, labour market, environment, and climate change, political economy and governance, human capital development, sustainable development goals, and financial economics. SANEM contributes to governments' policy-making by providing research support both in individual and organizational capacities. Since its inception, SANEM has maintained strong research collaboration with global, regional, and local think-tanks, research and development organizations, universities and individual researchers. SANEM promotes young researchers from Economics, Business, and Social Sciences to undertake independent research works on contemporary issues through its Annual Economists Conference and regular internship program for fresh university graduates. Also, it arranges regular training and workshops through its capacity building programs on economic modeling and contemporary economic issues for participants of South Asia.

SANEM is looking for dynamic and enthusiastic young economic minds with strong motivation in academic research for the position of Research Associate.
